

Patients have begun to be recruited for the imaging study in London, England. Within the next two months we hope to see the first patients being scanned for the MRI study. Continued funding is asked for as we are just in the beginning phases of research and want very much to see it continue. It costs almost \$80,000 USD per year to employ one research doctor. We would love for you to become a monthly donor and help us achieve our research funding goals. You can sign-up as a monthly donor here:
